WORK EXPERIENCE

Application Development Senior Analyst Accenture Solutions Pvt Ltd

11/2021 - Present

Mumbai, India

ECOMM AD

- Worked in SAP Hybris e-commerce suite which uses the Java as backend and manages all the activities of the client website.
- Developed bots in Automation Anywhere for order placement across different channels in dev/preprod environments to reduce manual overload for business and development teams and **save 150 man hours of manual testing annually**.
- This gave increased amount of confidence to business before every release goes in production and **helps in early identification of issues/defects** related to order flow/processing apart from **ensuring coverage of all kinds of test case scenarios**.
- Handled production issues by coordinating between client and development team.
- Managed the release process /deployments in pre-prod /production environments and collaborated with project managers, scrum master, developers, QA's and customers to resolve technical issues.
- Automated various aspects of SDLC and worked on various projects on CI/CD as a part of DevOps activity carried out at firm level.
- Added multiple alerting and monitoring over different metrics of the application for improved visibility using Appdynamics.
- Responsible for the SLA's, Uptime and Availability of the application by reducing the occurrences of the incidents, performing root cause analysis and improving the process around the same.
- Automated manual process of recovery during failures to reduce the mean time to recovery, thus ensuring higher availability. Worked on reducing alerts and BAU items to ensure the productivity of the team.
- Onboard new members of the team to ensure timely delivery of the action items and acted to unblock the team members in case of any issues.
